DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 9, line 1, "8" has been changed to -7—as mentioned in the Applicant's remarks filed 04/26/05.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a manufacturing method of an electron source panel having a plurality of electron emitting devices comprising at least the steps of: selecting a predetermined characteristics ^{shift} ~~SMA~~ voltage value from the plurality of characteristics ~~SMA~~ voltage values by referring to the characteristics adjustment table created for each of the electron emitting devices and applying the predetermined characteristics shift voltage to the electron emitting devices to shift the characteristics toward the characteristics adjustment target value wherein the some of the electron emitting devices to which the plurality of characteristic shift voltages having discrete values are applied are dummy devices different from the electron emitting devices to which the predetermined characteristics shift voltage is applied; and after shifting of the characteristics toward the characteristics adjustment target value, performing a step of monitoring a change of the

Art Unit: 2828

electron emission characteristics to revise a characteristics shift condition (claim 7). The remaining claim 9 is allowable by virtue of its dependency on the independent claim.

Hence, the examiner has allowed claims 7 and 9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Aoki et al, U.S. patent application 10/774,582, which fails to recite the step of monitoring a change of the electron emission characteristics to revise a characteristics shift condition, after shifting of the characteristics toward the characteristics adjustment target value.
